New Soviet Proposals for Long-Term Exchanges

Your memorandum dated 13 September 1957

The attached comments are submitted as requested in the referenced memorandum. Net advantage on the proposed exchanges is taken to mean 25X1X1 gain to the US versus 25X1X1 technological gain to the USSR. In some specific instances a technological gain may accrue to the US; if so, it has been mentioned separately. Your attention is invited to 25X1A2g 25X1A2g which suggests that the US ask for an opportunity to acquire detailed information on the operation of the Soviet economy as a whole, and not return industry visits.
